

Orthopedic Footwear and custom orthotics

ORTHOPEDIC FOOTWEAR OVERVIEW

Onzen Orthopedic Footwear

Orthopedic shoes are handcrafted, which gives them a high level of quality and durability. We use comfort foams, reinforced and soft leathers, as well as soles made with long-lasting materials.

OnZen orthopedic shoes are personalized, each foot problem is unique!

About Us

Moutinho Ribeiro da Silva is a Portuguese company dedicated to manufacturing high-quality footwear, with a special focus on three key areas: casual fashion, professional footwear, and orthopedic and diabetic footwear.

Our story began with a clear purpose: to respond to real and specific needs that, for a long time, had not found effective solutions in the Portuguese market. It was with this vision that the **OnZen** brand was born and formalized, a brand committed to comfort, health, and well-being.

Over the years, we have built a solid reputation in the industry, combining technological innovation, artisanal production, and an unwavering commitment to the comfort and health of our customers. Each pair of shoes reflects our accumulated experience, attention to detail, and respect for the individual needs of those who wear them.

We strictly comply with all industry standards and regulations, including NP EN ISO 9001 certification, ensuring high standards of reliability and performance in all products.

YOUR FEET → OUR SHOES

About our products

100% PERSONALIZED

Most AFO possibilities can be integrated inside your very own custom shoe.

AFO IMPLEMENTATION

Real 100% adaptation, your feet, your fashion taste, our shoes.

HANDCRAFTED TO PERFECTION IN PORTUGAL

Vast experienced and multi talented shoe makers, with dozens of years of experience.

TOP QUALITY MATERIALS

All the materials we use came from certified and high quality suppliers in order to guarantee only the best for your feet.

COMFORT AND HAPPY FEET

No more tight shoes, confort in every step.

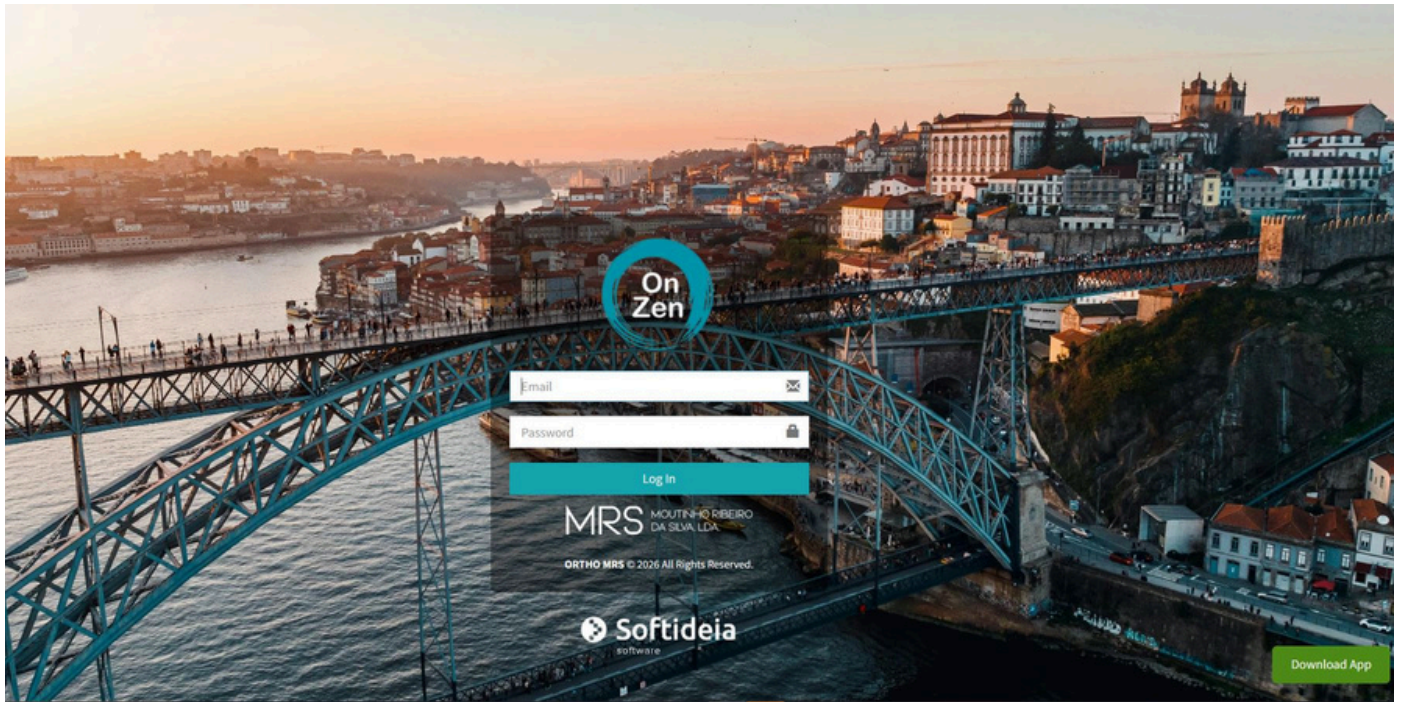

DONT HAVE A SCANNER?

NO PROBLEM:

Either send us your last directly or check with our partners near by you, they have a scanner you can use.

How it works

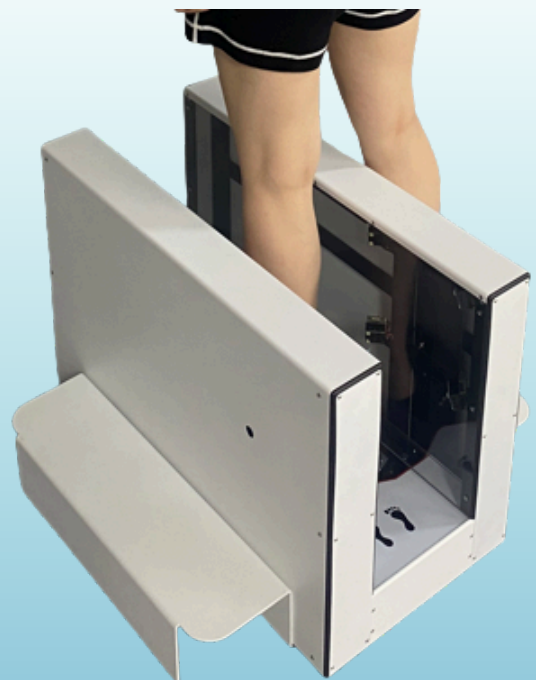

With MRS APP or website, you have endless customization possibilities, using our adaptable and intuitive orthotic solution. It's simple, just contact us to request the creation of an account and you can place your order.

3D Scan Technology

3D scan is revolutionizing healthcare, offering a wide range of benefits that enhance patient care, streamline medical processes, and open new frontiers in treatment. With 3D scan, orthoses can incorporate complex geometries and lightweight structures that are difficult to achieve with traditional methods. This results in stronger, lighter, and more aesthetically pleasing devices, improving both functionality and patient satisfaction.

If you do not have a scanner, plaster casts can be sent. It is also possible to purchase the scan or rent it monthly at a cost subject to minimum orders.
